

# Tag Campus

## A CAMPUS MANAGEMENT SOLUTION:

TagCampus is a new generation **Enterprise Resource Planning** application that positions campuses for growth and development by improvement of processes and management of knowledge. TagCampus is a single platform application that stores all the information of a campus in its database and allows inter-departmental co-ordination; thereby enhancing efficiency, productivity and strategic decision capability. The various models in a TagCampus Solution are:

## Strategic Implications:

Paper –Work = Inefficient, Ineffective & Inconsistent  
Paper-less CMS= Efficient, Effective & Effortless!!!

**SO LET'S GET RID OF ALL THIS HASSLE!!**

## Hardware

- **Attendance:** Record IN time for Employees & Faculties entering the Building
- **Secured Attendance:** Biometric technology ensures false or forged entries are discarded
- **Enroll:** New Faculties and Students

**RFID READER (HF)**  
(non biometric)

- Access control of students, staff and management installed at various locations in the campus
- Hierarchical Access provided
- Smart Cards have to be flashed for Real-time data acquisition

## BIOMETRIC READER

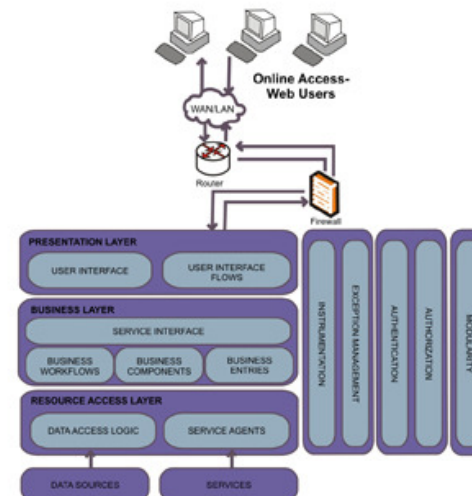

**SMART CARDS**

- Personalized Access cards for students, staff and management
- Only authorized personnel are allowed access
- Fingerprint sample is stored on the card if Biometric Readers are used.

## Technical Specifications

- Web-based Portal
- Hierarchical access of information
- Operating Platform: Windows XP, Windows 2003 & Linux
- Web Application: Java
- Database used: Postgres7, MySQL5.0, DB2 and Oracle10g
- Integration with Tally for Accounts Module
- Open source architecture for integration with 3rd-party application

## Software Architecture

## Snapshots of Reports
