

RFID BASED ACCESS MANAGEMENT SOLUTION – TAG ID

“AZB & PARTNERS AUTOMATES THEIR EMPLOYEE ACCESS AND ATTENDANCE USING A UHF RFID SOLUTION FOR A SMOOTH AND CONVINIENT WALK THROUGH ACCESS.”

COMPANY

AZB & Partners

TYPE OF BUSINESS

Law Firm

WEBSITE

www.azbpartners.com

LOCATION

Nariman Point, Mumbai

THE RESULTS

Allows simple access control of visitors, employees and the general public throughout a site, with respective permissions given by the Admin.

Easy to expand access control system if requirements change over the period of time.

COMPANY PROFILE

The meteoric rise in profile and status of AZB & Partners in the Indian legal market is beginning to be widely known. The three named partners are all well-respected, although in Mumbai Zia Mody still has a powerful profile. However, there is evidence that some of the younger lawyers are getting recognised by clients who are increasingly happy to instruct them, with Zia supervising from a distance.

This is a firm that has made its reputation through a passionate and successful commitment to quality, which has seen it win a number of the billion dollar M&A mandates of the past two years.

PROBLEM STATEMENT

The key challenge faced by the management team at AZB & PARTNERS was obtaining 100% Employee Management through an efficient Personnel Tracking System. The integration of automated identification technologies such as RFID enables the process of Personnel tracking to achieve higher efficiency and security while providing the management with total accuracy to make informed decisions.

BUSINESS CHALLENGES

- *Manual records of employee entry and exits*
- *No real time information about employee attendance*
- *Lack of structured reports*
- *Security concerns with Identity of employees*

SOLUTION

After proper identification of the challenges, Rasilant Technologies provided the client with an ace technology solution, which not only solved the existing challenges, but brought efficiency and safety to a different level, which is as follows:

- All staff members will be provided with UHF RFID cards.*
- The UHF Readers at the main gate and certain other strategic checkpoints will read the RFID tag on the card and grant access.*
- At other secure locations the RFID cards and readers will be used with door locks for access control.*
- Movement of staff within corridors will be identified using UHF readers and antennas*
